

## NL-ID “ACCESS”: Connecting Indonesian startups and Dutch companies to accelerate sustainability together

The Netherlands-Indonesia “ACCESS” program aims to facilitate fruitful connections between Indonesian startups and the Dutch private sector in the upcoming months through online workshops and one-on-one mentorships, as well as a matchmaking event. These activities will allow exchange of knowledge and expertise, supporting Indonesian startups to scale their sustainable solutions, and at the same time promoting mutually beneficial collaboration opportunities with Dutch companies to solve shared challenges. Indonesian startups and Dutch companies can express interest in participation in the program until 5 October.

### About the program

The “ACCESS” program is a collaborative program initiated by the Embassy of the Kingdom of the Netherlands in Indonesia, supported by the Netherlands Enterprise Agency, in partnership with Angel Investment Network Indonesia (ANGIN) and Unknown Group. This program focuses on Circular Economy, Sustainable Mobility & Transport, and Life Sciences & Health. Dutch companies and Indonesian startups participating in the program will be matched to accelerate sustainable solutions in solving the identified shared challenges. Furthermore, the Indonesian startups will be able to gain sector-specific insights and best practices from the Dutch mentors in the program. This program also complements the findings of the Scoping Study by ANGIN on [Connecting Indonesian Startups and Dutch Companies](#), published in 2020.

### Participation

Indonesia-based startups, as well as Dutch companies seeking sustainable solutions within the aforementioned areas can **express interest in participation** in the program until 5 October. Ten selected Indonesian startups will then follow the online activities throughout October and November, and will participate in the matchmaking event planned at the end of the program. To complete the process, “aftercare” mentoring sessions will be provided to tailor the solutions to the local context.

### More information

**For more details on the program, please refer to the banner below, and visit the official website: [nl-id-access.com](https://nl-id-access.com)**

The NL-ID “ACCESS” team is ready to provide further information through the contact points below:

Deadline:

5 October 2021

Our Partners

### Startup Requirements

- ✓ An Indonesian-based startup providing a solution to a pertinent problem that falls within one of the highlighted challenge areas.
- ✓ Your startup has progressed beyond the ideation stage (MVP) and has established sufficient traction to execute.
- ✓ Your startup has a well-defined strategy that is consistent with current sustainability trends.
- ✓ Your startup is open to mutually beneficial collaboration with Dutch companies in solving challenges within the identified challenge areas.
- ✓ You can commit to attend all of the program sessions that will be conducted in English.

### Why You Should Apply

- Access to more than 20+ experienced practitioners in the relevant industry through our 4-week online preparation program with interactive workshops and mentorships.
- The opportunity to explore potential partnerships and scale up your solutions through collaboration with Dutch partners and experts.
- The opportunity to gain exposure to and network within the Dutch and Indonesian innovation ecosystems.
- The program does not require any fee.
