

FNS RESULTS AND INDICATOR FRAMEWORK 2022

Outcomes (= NL fair share in SDG-2 targets 2030)		
32 million people¹ lifted out of undernourishment	8 million small scale food producers² doubled productivity and income	8 million hectares of farmland³ converted to sustainable use
Outcome indicators (cumulative, proxies for contribution to target)		
A.1.1. Number of people with a more diverse and adequate diet A.1.2. Number of people whose nutritional situation became more resilient to shocks	B.1.1. Number of small-scale food producers who progressively realize a living income B.1.2. Number of small-scale food producers who progressively decrease the yield gap B.1.3. Number of female small-scale food producers who progressively become more empowered B.1.4. Number of small-scale food producers whose livelihood became more resilient to shocks	C.1.1. Number of hectares of farmland under at least 2 conservation practices C.1.2. Number of hectares of farmland that agro-ecologically became more resilient to shocks
Outputs		
Undernourished people benefitting from activities to improve nutrition	Small-scale food producers benefitting from activities to improve performance	Farmland³ benefitting from activities to strengthen ecological sustainability
Output indicators (non-cumulative)		
A.2.1 Number of people directly reached with activities aimed at structural/systemic improvement of their nutritional situation A.2.2 Number of people directly reached with activities aimed at temporary/partial improvement of their nutritional situation A.2.3 Number of people indirectly reached	B.2.1 Number of small-scale food producers directly reached with activities aimed at structural/systemic improvement of their agricultural performance B.2.2. Number of small-scale food producers directly reached with activities aimed at temporary/partial improvement of their agricultural performance B.2.3 Number of small-scale food producers indirectly reached	C.2.1 Number of hectares of farmland directly reached with activities aimed at structural/systemic improvement of agro-ecological sustainability C.2.2 Number of hectares of farmland directly reached with activities aimed at temporary/partial improvement of agro-ecological sustainability C.2.3 Number of hectares of farmland indirectly reached

¹ Mainly children under two and their mothers.

² Small-scale food crop/livestock/fish producers, disaggregated for male/female and age (% < 35) . For FAO definition see <http://www.fao.org/3/a-i6858e.pdf> <http://www.fao.org/3/CA2591EN/ca2591en.pdf>

³ Including pastures and fishing grounds

FNS RESULTS AND INDICATOR FRAMEWORK 2022

Enablers for FNS		
Knowledge & Innovation Systems	Policy environment	Land Rights
Indicators		
D.1. Number of small-scale food producers applying new technologies/practices that aim to transform food systems towards desirable outcomes⁴ D.2. Number of FNS-relevant knowledge and extension institutions reached with interventions that aim to strengthen their capacity D.3. Share of supported international partnerships* with participation of Dutch knowledge institutions *aimed at transformation of food systems.	E.1. Number of reforms / improvements in major⁵ (inter)national FNS policies / laws / regulations	F.1. Number of people⁶ who enjoy (more) secure tenure rights to land F.2. Number of (inter)national institutions that contributed to improved (sub)national land governance aspects

⁴ Disaggregated for male/female and age (% <35)

⁵ Benefitting at least tens of thousands of undernourished people and/or small scale food producers

⁶ Disaggregated for male/female and age (% < 35)
