Name of product/service/project:

Outstanding project in the field of renewable energy and energy efficiency (5 points): Which of the following strategies do you use? Please fill out the fields relevant to you.

R0 – Refuse	If applicable: Using renewable energy sources to cover your energy needs. Consider, for example, your own production or a service contract that guarantees that the energy used (or part of it) comes from renewable sources.
R1 – Rethink	If applicable: Making products/services/processes more energy efficient. Think, for example, about optimising your business processes or introducing energy-saving practices.
R2 – Reduce	If applicable: Increasing the efficiency of the product/service by using less energy or reducing emissions. Describe how and to what extent you have reduced the environmental impact through your project! Reducing carbon dioxide emissions and/or energy consumption is an important aspect.

SUSTAINABLE TULIP AWARD APPLICATION FORM 2025

R3 – Reuse	<p>If applicable: Energy recycling, e.g. through on-site power plants, cogeneration, or waste-to-energy solutions.</p>
R4 – Repair	<p>If applicable: Repair and maintain the defective product/device so that it can be used in its original function. Explain how the project has increased the product's lifespan, thereby reducing the need for new, energy-intensive production.</p>
R5 – Refurbish	<p>If applicable: Refurbishment or renewal, modernisation of an old product/equipment/building/service. Consider the use of digital technologies too.</p>
R6 – Remanufacture	<p>If applicable: Restoring the functionality of a end-of-life product/asset into a new-like product.</p>
R7 – Repurpose	<p>If applicable: Use discarded product/service or its parts in a new product/service with a different function.</p>

Impact (5 points): Can you quantify your impact on energy efficiency? How do you measure the results of the above points?

Cooperation (5 points): How do you cooperate with other companies/organisations?

Business model (5 points): Do you have a financially sound business model? Please describe the financial viability and sustainability of the projects mentioned in the above points.
