

Protecting Healthcare in a Digital Age Cybersecurity seminar, 23 October 2025

Speakers bios

Kingdom of the Netherlands

Joost Reintjes, Ambassador to Sweden

Since August last year I am the NL ambassador in Stockholm. With more than 400 years of well-developed relations between EU and NATO partners Sweden and NL my role is to work with the team in further helping to develop these ties in trade and investment, innovation, political cooperation, security, culture, and people-to-people.

Kim Elman, Country Manager Sweden

Kim Elman is currently the Country Manager for Sweden at Northwave Cyber Security, a leading European provider of innovative cybersecurity services. He is a certified information security professional (CISSP), a sought-after trainer, keynote speaker, and trusted expert in the field. With a background that includes service in the Swedish Armed Forces' Psychological Operations unit, Kim holds a Bachelor's degree from the Swedish Defence University and an Executive MBA from the Stockholm School of Economics. Kim has extensive experience in building and growing organizations. Most recently, he established the Center for cybersecurity at RISE, Sweden's research institute, focusing on interdisciplinary research, complementary perspectives, and emerging threats, trends, and opportunities.

Marc de Jong Luneau, GM Nordics & Director Strategic Projects

With close to thirty years of experience in Cyber Security, Marc de Jong Luneau is a veteran in the field. As General Manager Nordics his focus lies on representing Northwave's value-add to clients in Scandinavia. He is an advisor to senior leadership both during cyber crises as well as in the continuous process of preventing them.

Joel Fidalgo, CIO

CIO of NextPharma a leading European CDMO, Joel joined NextPharma in 2020 with the focus to digitize the Business Processes across all NextPharma sites to support the future growth of the company. Before joining NextPharma, Joel spent over 6 years at a primary packing material producer for the pharmaceutical industry in different global IT Leadership positions and before worked over 6 years as IT Management Consultant for international customers across various industries.

Anders Hansson, Security Advisor

Anders Hansson is a Security Advisor at Sectra, specializing in critical infrastructure. He works to strengthen organizations' ability to prevent, detect, and respond to cyberattacks targeting OT and energy systems. With experience in both technology and strategic security, Anders contributes to developing solutions that meet the high demands on resilience and preparedness in essential services.

Arno van der Heijden, Cybersecurity Solutions Consultant

Arno van der Heijden is a Cybersecurity Solutions Consultant at Philips, where he helps healthcare providers safeguard their medical solutions throughout their long operational lifecycles. With over four years at Philips and a long-standing career in cybersecurity, Arno brings deep expertise in managing cybersecurity controls in highly regulated environments. In the medical device industry, cybersecurity goes beyond protecting data—it's about ensuring patient safety and maintaining clinical effectiveness. Arno supports Philips' customers in navigating these unique challenges by aligning cybersecurity strategies with regulatory requirements and lifecycle management. His work focuses on securing medical systems against evolving threats while preserving their integrity, availability, and confidentiality.

Arno is passionate about bridging the gap between technical cybersecurity measures and clinical realities, helping stakeholders understand the impact of security on patient care. His pragmatic approach and industry insight make him a trusted advisor in the field of healthcare cybersecurity.

Ministry of Health, Welfare and Sport

Marcel Floor, CIO

Marcel Floor is a manager at the Ministry of Health, Welfare and Sport in The Netherlands. He leads teams within the Information policy Directorate with focus on horizontal elements essential for facilitating trustworthy and secure health data exchange within the Netherlands. Being trained as a lawyer in the Netherlands and in Spain, he started his professional career in the National Parliament. Within the Ministry of Health, Welfare and Sport he had several (managerial) positions in a broad variety of policy domains, often with urgent political dimensions. Marcel served as a senior diplomat in Brussels, Beijing and recently in New Delhi, India.

Michel Silvestri, Senior Advisor

Michel Silvestri is a Biomedical Scientist and PhD, with a background as University Lecturer at Karolinska Institutet and laboratory manager at Visby Hospital, Gotland. Michel is Senior Advisor at the Swedish eHealth Agency, with past and current leadership in government assignments for national digital infrastructure as well as within EU and Nordic projects preparing for the European Health Data Space, EHDS. This includes EU projects such as TEHDAS, X-eHealth and current Xt-EHR, as well as the VALO Project (Value from Nordic Health Data) under the Nordic Council of Ministers. Michel was also member of the Swedish team for EU negotiations of the EHDS regulation. In relation to cybersecurity, Michel is a chair person for a new national network for Post-Quantum Cryptography in Health and Medtech.

Sebastiaan Meijer, professor of healthcare logistics

Sebastiaan Meijer is professor of healthcare logistics at KTH Royal Institute of Technology. He moved from The Netherlands to Stockholm in 2012. Healthcare logistics aims to find methods to provide the right care to the right patient at the right time and place, with the right information and resources. Data-driven methods become more and more important in this domain. He currently leads the EDIH Health Data Sweden, and serves as vice dean for the CBH school at KTH.

**Dr. Wim Hafkamp, Managing Director**

Since 1 April 2020, Wim Hafkamp has been director of the Z-CERT foundation, the Cybersecurity expertise centre for the Dutch Healthcare sector. In 2023 he also obtained a role as chairman and quartermaster for the European Health Information Sharing and Analysis Centre (EH-ISAC). The main goal of this new initiative is to set up an information exchange platform for Cybersecurity between healthcare providers in Europe. Wim has a long track record in information security. Among other things, he worked as deputy director at the National Cyber Security Centre in The Hague. Until 2018 he was Group CISO at Rabobank, one of the largest banks in The Netherlands.

Wim has held various ancillary positions in the field of information security. For example, he was founder and chairman of both the Dutch and European versions of the exchange platform Financial Institutions - Information Sharing and Analysis Center (FI-ISAC). From 2017 to 2019, he also chaired the advisory board of DCYPHER, the Dutch platform for Cybersecurity research and higher education. In addition, he was active for six years as a member of the advisory board of ENISA, the European Agency for Information and Network Security.

Wim has a legal and business economics background and also obtained his PhD at the University of Amsterdam in 2008 on the subject of 'Vulnerability and incident response in ITIL oriented organizations'.
